TITLE : REFILL TYPE COATING FILM TRANSFER MEANS

ABSTRACT : PROBLEM TO BE SOLVED: To provide a coating film transfer means allowing the replacement of only a transfer tape and capable of connecting a couple of upper and lower case members at the same time by moving a transfer head to a usable position.

SOLUTION: At the rear end of a case body 1, an engaging claw 4 and an engaging recessed part 5 for locking the engaging claw 4 are formed on one of the couple of upper and lower case members 1a and 1b and on the other of them, respectively. At the front end thereof, round holes 8a and 8b and slits 9a and 9b extending forward from the round holes are formed on the upper and lower case members 1a and 1b, respectively. The transfer head 3 is formed of a cross-sectionally I-shaped member, and locking buttons 12a and 12b comprising head parts 14a and 14b capable of passing through the round holes and shaft parts 13a and 13b capable of advancing the inside of the slits are fixed on the upper and lower surfaces of the middle position in its longitudinal direction.
